Application/Control Number: 10/764,297 Page 2

Art Unit: 3728

1. This application contains claims directed to the following patentably distinct

species of the claimed invention:

I. The stop systems shown in figures 1-4F.

II. The lock out systems shown in figures 5A-5D.

III. The cable end tightening systems shown in figures 6-7C.

IV. The fit adjustment systems shown in figures 8-9B.

V. The cable length adjustment systems as shown in figures 10-11.

It is noted that if applicant elects species I, the following subspecies election is also

required:

A. The stop device shown in figures 1-2C.

B. The stop device shown in figures 3A-3C.

C. The stop device shown in figures 4A-4C.

D. The stop device shown in figures 4A and 4D-4F.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species

(and subspecies if applicant elects species I) for prosecution on the merits to which the

claims shall be restricted if no generic claim is finally held to be allowable. Currently, no

claims are generic.

Applicant is advised that a reply to this requirement **must include an**

identification of the species that is elected consonant with this requirement, and

a listing of all claims readable thereon, including any claims subsequently added. An

argument that a claim is allowable or that all claims are generic is considered

nonresponsive unless accompanied by an election.

Application/Control Number: 10/764,297 Page 3

Art Unit: 3728

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 10/764,297

1. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Other useful information can be obtained at the PTO Home Page at www.uspto.gov.

In order to avoid potential delays, Technology Center 3700 is encouraging FAXing of responses to Office Actions directly into the Center at (703) 872-9306 (FORMAL FAXES ONLY). Please identify Examiner Marie Patterson of Art Unit 3728 at the top of your cover sheet.

Any inquiry concerning the MERITS of this examination from the examiner should be directed to Marie Patterson whose telephone number is (571) 272-4559. The examiner can normally be reached from 6AM - 4PM Mon-Wed.
